## Daily Weather Threat Briefing

Regional Operations Center

Western Region

Friday, November 11

**Day 1 (Friday):** Areas of dense fog will be seen across portions of the Central Valley through late morning and again tonight. Locally gusty winds over portions of southern California (mainly the Los Angeles and Ventura County mountains/foothills) will bring locally elevated fire weather conditions

# Weather Key Points

Regional Operations Center

Western Region

Friday, November 11

- Below normal temperatures will persist over much of the state through the weekend and early next week, with overnight low temperatures dipping into the 30s across the Central Valley and even for areas closer to the coast at times. Readings over the higher elevations will reach the single digits.
- Areas of overnight and morning dense fog are expected across the Central Valley through the weekend, with locally significant reductions to visibility expected
- Light valley rain and mountain snow will occur over portions of northern California late Friday through Saturday night, including the northern Sierra. Snow levels will hover between 3,500 and 4,500 feet, though no widespread or significant impacts are expected at this time with mountain snowfall amounts of 1 to 3 inches
- Locally breezy winds gusting up to 45 mph are expected over the Los Angeles and Ventura County mountains Friday, bringing locally elevated fire weather conditions
  - Additional breezy winds are forecast across much of southern California on Sunday
  - A Santa Ana wind event is looking likely Tuesday through Thursday (strongest Wednesday) in southern California, with locally elevated fire weather conditions

# Weather Outlook (6-14 Days)

Regional Operations Center  
Western Region  
Friday, November 11

## **6-10 Day Outlook (November 16 - 20)**

### **Temperatures**

- Below normal temperatures are favored to persist across the state

### **Precipitation**

- Below normal precipitation is favored across the majority of the state

## **8-14 Day Outlook (November 18 - 24)**

### **Temperatures**

- Below normal temperatures are favored for the majority of the state, with the exception of far northern California where near normal temperatures are favored

### **Precipitation**

- Near normal precipitation is favored for most of the state, with above normal precipitation favored for far northern California

# Risk Assessment Matrix

Regional Operations Center

Western Region

Friday, November 11

## Impact Level Definition

- 1. Impactful weather is not expected.**
- 2. Potential threat to lives and property if no/incorrect actions are taken.**
  - Localized impacts on commerce possible.
  - Includes events that occur frequently.
- 3. Potential threat to lives and property if no/incorrect actions are taken.**
  - Impacts on commerce possible.
  - Includes events that occur a few times per year.
- 4. Actions likely needed to save lives and/or property.**
  - Significant impacts to commerce possible.
  - Includes events that occur infrequently.
- 5. Actions required to save lives and/or property.**
  - Significant and extended impacts to commerce.
  - Includes exceptionally rare events.
